I invite you to know this

Did you know that it is possible to communicate with the baby in the womb?

One of the most sublime gifts is to access the plane of a baby in gestation! I remember the first time a baby soul appeared, it was unexpected, the baby was only 2 months pregnant in her mother's womb and the session had a different focus. But we can't control a channeling session, that baby wanted to communicate! and took the entire session to tell Mother what she was going to do on The Earth, the baby wanted to be seen, heard and considered within the family plans. Each soul chooses what they want to transmit, there are some that are very detailed, others more reserved, our role is simply to be their voice, there is no manipulation of their field, it is only to contemplate and receive what they want to pass through our channel.

We can even connect with the spirit of a baby that is waiting to incarnate in the her mother's body!

You who accompany births, do you feel that your academic knowledge fails to respond to the various situations that arise in a birth?

In most cases, academic knowledge can solve the problems within a childbirth, but there is a minority and it is important to include it, cases in which these scientific keys are not enough. If you could learn a method that allows you to complement your knowledge, diversify your perspective and address each case, from the possibility of connecting with the Woman & baby, honoring their history, times, orientations of the spirit, energy needs and above all the divine plan for walk in beauty on earth, would you?

There is a whole unconscious world that needs to be considered in a spiritual process as it is the Birth, here you can remember the path to position yourself from that approach and accompany the Mother in the transit of the life-death-life threshold.

Is there a deep call from your Soul to heal the wounds of your Maternity?

Of the great ghosts that haunt us, we find the traces left by childbirth when we have gone through the vibration of invasion, mistreatment, disempowerment, lack of respect, invisibility of our needs, among others. It can take years to recover! Women who carry deep frustrations for not giving birth vaginally. Women who reject their children. Women who are ashamed of not breastfeeding their babies! How many wounds can we recognize in motherhood?

When we channel the Soul of the Woman we can understand the energetic origin of each lived experience and make conscious the learning that it brings for her evolution. It is a deep cure! It's called transcendence and it frees us from pain!

Do you recognize this phrase? "I've been trying to get pregnant for years."

Millions of people are diagnosed with infertility. Several of the cases that I accompany refer to past lives to find the origin, chastity contracts, memories of celibacy, sexual abuse, rape, abortions, sexual exploitation, various may be the causes of the vibrations that emanate from those experiences and they translate into a field that is not conducive to gestation. The fragmentation of our Soul by traumatic events gives entrance to the vibration of death in our womb. What we do is channel the origin of these problems and release the auric field to reestablish a new frequency that is in resonance with gestation. We return the vibration of fertility and fecundity to your body, soul and spirit, you recover the power of a Matrix that pulses life! You manage to gestate and give birth to the children of this humanity! It's possible! it is real! It needs your trust and dedication to heal the old hidden and forgotten wounds in your unconscious.

YES, I RECOGNIZE MY SON FROM HIS ENERGY

To Mother from the SOUL

Each Being that arrives on Earth comes with specific energies that determine their path and their personality, they are vibrations that allow them to recognize what is most appropriate for them to develop their innate abilities!

I guide each Mother to observe her children from the eyes of the Soul, reminding them that they have come to fulfill a purpose in the World. It is possible through channeling to access the spiritual library and bring its energetic truths into awareness. Every time my son gets sick or is in a crisis period, I enter his field to understand what he is going through and thus be able to care for, watch over and respect his life as he deserves. All Mothers go through challenges that sometimes generate Fear. I propose you to incorporate this method in your life to accept and embrace your children without imposing your truths and expectations, allowing them to be what they are by essence and collaborating in their growth by enhancing their light!

I want to share some of my truth

The instruction of my Spiritual Teachers has led me to navigate a subtle world in which it is possible to speak with the spirit of a baby in gestation, I can listen, know, feel what it is wanting to communicate, I recognize its needs and I bring the messages from that plane to the ears and heart of his Mother. I have witnessed deep cures in the wombs of women to reconcile with their bodies after aborting and redefine the presence of those unborn children. The birth of my son was the milestone that brought me absolute conviction of the need to have a spiritual accompaniment in the preparation for childbirth, and a look from that subtle dimension and establish the role of a doula that accompanies the transition of the spirit, it is the truth that I reaffirm the most in this present, to return the sovereignty to the Woman from listening and guiding her own inner wisdom to see the exercise of childbirth respected from a comprehensive vision of all spheres.

To conceive, gestate, give birth and nurture are spiritual processes that need to be covered from the energy field. Many of the questions that cannot be resolved by Science are answered from the plane of the Spirit, cases of women who have been diagnosed as infertile, have been able to gestate without the intervention of allopathic medicine. On the other hand labors that do not progress, are triggered after channeling the Soul of the Woman by making visible the disharmonies of the emotional, mental, spiritual, ancestral plane. It is possible to act safely and non-invasively with irradiation of light frequencies in cases of placenta previa, uterine prolapse, etc., being able to take care of complex health situations in a vibrational way. Depression processes in the puerperium are regulated after harmonizing and closing the body energetically. I have seen magic happen when the Soul is given space to take its place in the sacred spiral of life.

I invite you to walk this path and take these experiences as part of your truth as well!

I feel sincere gratitude to be able to sow these seeds in the hearts of women.

Channeling

Being a bridge between worlds

The art of channeling

Channeling is an expanded state of consciousness that can be translated as a paradigm of life, it is a portal that allows the recognition of the various dimensions in which we are immersed from a cosmic vision of the human being. As a vibratory activity, it is executed from the Pineal Gland & Pituitary Gland when they enter into resonance and allow us to experience communion with everything that exists.

The vibratory field of channeling occurs when the brain manifests a specific frequency, the so-called Theta waves, these generate a state that allows communication with the spiritual world through our extrasensory gifts (clairvoyance, allknowing clarity, clairsaudience, intuition, telepathy) the communication with the spiritual world that is revealed and made visible so that we can broaden the vision of what makes up our reality.

Channel Woman

Every Woman carries in her internal codes the power to be a mediator between the material and spiritual planes. Our temple body is designed to house the Mysteries of creation, it is enough to enter into receptivity to listen to the breath of the Soul. The seed of every Channel Woman is latent, waiting for the moment to germinate.

We are the channel of communication between heaven and earth, our role as Guardians of thresholds is part of the inherent wisdom of the feminine aspect, it is our part to assume the commitment to open paths to inherit to the next generations a World that honors all planes of existence.

Formación de Canalizadoras Doular desde el Espíritu

We can all channel!

It is innate, organic and part of human nature.

No prior knowledge is required.

Only confidence in yourself and the will to be ready to collaborate in the great fabric of life.

What does a lifecycle channeler do?

She can channel processes related to pre-conception, gestation, preparation for childbirth and the puerperium. We also accompany the growth of sons and daughters in each seven-year period of life.

A session occurs when the channeler enters a state of meditation and connects with the Soul of the Woman and her baby in the womb (if she is gestating) from a place of deep listening, she relates information that is found in the unconscious, in the body, in the memories of past lives, in the inheritance of ancestral lineage, in the couple bond, in the family systemic field, etc. They are vibrational truths that need to come to light to restore internal and external order. We orientate from the guide of the inner wisdom of the person himself.

What is the place of the channeler / Spirit Doula?

Every time we channel we are healing a part within us!

Every time we channel another person we are also receiving healing, in each session a mirror is generated, something of my personal evolution process is present, it is a circular field that allows us to enter into resonance and recognize the similar parts between people. Serving others is serving the whole. When a woman heals, her entire lineage receives it and we can be a channel for those blessings to manifest.
